If you're ready for the truth about Iraq, it's all here in Saddam Hussein: Weapon of Mass Destruction. Finally, a film with no political agenda, daring to expose the historical facts about Saddam's rise to power, his world-defiant reign of terror and the events leading to his demise. Witness one of the most powerful ever collections of interviews and imagery, including: Mass graves and WMD survivors; rare footage from the September 11th attacks on America; candid interviews regarding the United Nations with historian Victor Davis Hanson; the cold blooded atrocities of Saddam's personal henchman, Chemical Ali. Based on facts from its dramatic beginning to a soldier's tribute ending, "Weapon of Mass Destruction" is guaranteed to educate and promote dialogue for years to come.
